

COMPUTER INFORMATION SYSTEMS

COMPUTER NETWORKING (CNC)

Overview

This certificate will provide the students with the necessary skills to design and manage a cloud-based network. Upon completion of the certificate, the student, in addition to acquiring an understanding of the basic data communication and networking concepts, will be proficient in the basic skills to manage both virtual and real servers and networks. The certificate will provide students with a solid foundation in cloud platform components. Students completing the certificate may pursue careers in network support and server administration. Students who complete the CNC certificate may choose to continue coursework to complete the entire A.A.S. degree in Computer Information Systems (CIS) at DCC. A Certificate is awarded upon completion of the requirements for this program.

A Certificate is awarded upon completion of the requirements for this program.

Students who successfully complete the Certificate in Computer Networking (CNC) will be able to:

- Demonstrate an appreciation of the breadth and complexity of the IT communication field;
- Identify and describe the necessary required skills in each of the segments in the IT industry communication sector;
- Design an effective LAN and WAN;
- Manage, maintain and optimize a LAN;
- Demonstrate proficiency in Linux and Windows;
- Demonstrate the technical and business aspects of the internet;
- Implement routing principles.

Courses should be selected in consultation with an advisor.
